Aleksandra Nowak

Data Analyst · Forecasting, Power BI and dbt · Retail and Logistics
Kraków, Poland | +48 600 100 200 | aleksandra.nowak@example.com | linkedin.com/in/aleksandra-nowak-example

Summary

Data analyst with 6 years in retail and logistics who builds forecasts and dashboards around the decisions operations teams make every week, now aiming for a Senior Data Analyst role. Works in Python, Power BI and tested dbt models, with stakeholder management that starts on the warehouse floor or in the meeting room. At Lumina Retail, a garden-range forecast cut error from 31% to 19% MAPE in back-tests and won the 2024 Analytics Impact Award.

Experience

Data Analyst — Jul 2023 – Present
Lumina Retail — *Kraków, Poland*

Home and garden e-commerce retailer, about 400 people, 6 sales regions

- Built a gradient-boosting demand forecast for the summer garden range in Python (pandas, scikit-learn) with weather and promotion features; back-tested on two seasons, it cut forecast error from 31% to 19% MAPE
- Explained the forecast to the buying team as ranges, not single numbers, with a one-page explainer; end-of-season markdown stock was about 12% lower than in 2023
- Own the weekly commercial reporting suite and its data modelling in dbt, writing SQL with window functions
- Run data-quality checks on the order pipeline

Junior Data Analyst — *Apr 2022 – Jun 2023*

- Sat in on three regional Monday meetings, then replaced a 40-tab Excel pack with a one-page self-service Power BI dashboard of the five KPIs managers used; preparation fell from about 6 hours to 30 minutes a week
- Moved the manual SQL extracts into tested dbt models on PostgreSQL, eliminating copy-paste errors, and switched off the old pack once all 6 regional managers used the new report every week

Junior Business Analyst — Jul 2020 – Mar 2022
Vistula Logistics — *Kraków, Poland*

Third-party logistics operator, 2 warehouses, about 250 warehouse staff

- Spent two night shifts on the warehouse floor with the shift leaders, then built an hourly picking-accuracy dashboard in Power BI from scanner data, showing errors during the shift instead of a week later
- Trained all 8 shift leaders in both warehouses to use it at handover; picking errors fell 18% in three months

Volunteering

Volunteer Data Mentor — Oct 2021 – Present
Data Girls Kraków — *Kraków, Poland*

- Run monthly beginner SQL and Power BI workshops teaching women to analyse data

Technical Skills

Data: SQL (window functions), dbt, PostgreSQL, Google Cloud Platform / BigQuery (certification in progress)
Analysis and BI: Python (pandas, scikit-learn), Power BI (DAX, Power Query), demand forecasting
Spoken languages: English (C1), Polish (native)

Certifications

Microsoft Certified: Power BI Data Analyst Associate, Microsoft — May 2023
dbt Fundamentals, dbt Labs — Feb 2024
Google Cloud Professional Data Engineer, Google Cloud — in progress, expected Dec 2026

Education

AGH University of Krakow — Kraków, Poland
MSc, Applied Mathematics (Data Science track) — *Oct 2018 – Jul 2020*

- Thesis: Short-term demand forecasting for perishable goods

Krakow University of Economics — Kraków, Poland
BSc, Econometrics — *Oct 2015 – Jun 2018*
